

Farmer Environmental Group Announces New Florida Office

Navarre, FL – 2 January 2020— Farmer Environmental Group, LLC, an international environmental services firm, has expanded its operations to include a new office in Florida (Florida Asbestos Business Organization License #ZA550). The Florida office is Farmer Environmental Group’s 7th office and positions them with a presence in the Southeastern United States. “The rewards of the Environmental Consulting industry are knowing that we make a difference with our clients,” said Craig Farmer, CEO of Farmer Environmental Group, LLC.

Since 1994, Farmer Environmental Group has grown from a single office in Dallas-Fort Worth to 7 branch offices throughout the United States. Farmer Environmental Group has increased its presence due to a keen understanding of their clients’ expectations. This understanding helps them to build trust with new and existing businesses. They take pride in the confidence their valued clients have in the Farmer team to stand firm on regulatory issues. As they grow, they strive to ensure they provide timely, professional, and valued services to their clients.

Craig Farmer added, “our Northwest Florida location will give us easy access to the Southeastern states, allowing for quicker emergency responses.”
